EAS RF label can be divided into RF soft labels,AM soft labels,DR labels and RFID soft label.RF label are widely used, including supermarkets, cosmetics, clothing, shoes and other retail stores.RF label are usually attached directly to the surface of the product.

The chip is the most important part of the RF label, and its anti-theft performance can be distinguished according to the chip inside. Our factory uses the highest quality raw materials, and we will conduct repeated tests on the performance of the RF label to accurately calculate its maximum detection range.
